

Revised Newborn Enrollment Notification Report

CommunityConnect HealthPlanSM (CommunityConnect) posts forms and information of importance to our provider community on our provider web site at www.communityconnecthealthplan.com. The CommunityConnect form used by providers to report newborn deliveries has been revised to be consistent with data required by the Department of Health per ForwardHealth Update Number 2011-26.

Changes to the CommunityConnect ***Newborn Enrollment Notification Report*** are minimal and include:

- A required field for recording gestational age in weeks
- Removal of the requirements for the newborn's first and middle name
- A field to indicate if the newborn is going to foster care or adoption
- A reminder that newborn weight and gestational age are required

The Medical Management section of the Provider Manual outlines the requirements for notification of newborn deliveries on page 34:

Notify CommunityConnect of newborn deliveries. Use the **Newborn Enrollment Notification Report** following the fax and timeline instructions provided on the form. Failure to notify us of deliveries may result in claim denials.

The Provider Manual is posted on the CommunityConnect website at www.communityconnecthealthplan.com > Provider > Provider Education.

The revised form is posted on the Forms page of our web site and can also be accessed by clicking here [Newborn Enrollment Notification Report](#).

If you have any questions or require more information, please contact CommunityConnect Medical Management at **1-877-471-6656**.
